Summary

Full Stack Developer with three shipped applications using **React 18**, **Next.js 14**, **Node.js**, and **PostgreSQL**. Experienced in **AI integrations** (OpenAI GPT-4, Gemini), **microservices**, event-driven systems, and **CI/CD pipelines**. Seeking a Full Stack, Software Engineer, or AI Engineer role.

Technical Skills

Languages: JavaScript (ES2022+), TypeScript, Python, HTML5/CSS3, SQL, C++

Frontend: React.js 18, Next.js 14 (SSR, RSC, App Router), Tailwind CSS, Shadcn/UI

Backend & DB: Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, Redis

AI / ML: OpenAI GPT-4, LangChain, RAG, Prompt Engineering

DevOps & Tools: Docker, GitHub Actions (CI/CD), Vercel, Render

Projects

DevPulse — AI Engineering Intelligence Platform | [Live Demo](#) | [GitHub](#)

Next.js 14 • OpenAI GPT-4 • BullMQ • Redis • PostgreSQL • Docker • GitHub Actions

Built a **DORA metrics dashboard** processing **500+ GitHub webhook events/day** — eliminated **~4 hrs/week** of manual reporting per engineering team.

Integrated **OpenAI GPT-4 PR risk scoring** that classifies 100% of PRs across 3 risk tiers, reducing estimated post-deploy incidents by **30%**.

Architected an **event-driven BullMQ + Redis pipeline** achieving **sub-200ms** response times; containerised with Docker and deployed via **GitHub Actions CI/CD** — cutting release time by **70%**.

Movie Ticket Booking System | [GitHub](#)

React 18 • TypeScript • Node.js • Express • PostgreSQL • WebSockets • Jest

Engineered a **concurrency-safe seat reservation system** using PostgreSQL advisory locks — **0 booking conflicts** under **200 concurrent users** in stress testing.

Delivered **real-time seat sync** via WebSocket broadcasting at **<500ms latency**; achieved **85%+ test coverage** with Jest across all core booking flows.

Wealth — Personal Finance Management System | [GitHub](#)

Next.js 14 • Clerk • Prisma ORM • PostgreSQL • Google Gemini Vision API • Zod

Integrated **Google Gemini Vision API** for automated receipt parsing — **~90% accuracy** across 10+ formats, saving **~3 min/transaction**.

Built with **Next.js 14 SSR + Clerk RBAC**, achieving **FCP under 1.2s** and Core Web Vitals compliance; secured all endpoints with **Zod validation** and XSS-safe handling.

Education

RKDF University

B.E. in Computer Science & Engineering

Coursework: DSA, DBMS, OS, Computer Networks, OOP, Software Engineering, System Design

LeetCode: 300+ problems solved — arrays, graphs, DP, system design | [View Profile](#)

Bhopal, MP, India

Graduated: June 2025

St. Thomas Convent Sr. Sec. School

12th — Science (PCM)

Bhopal, MP, India

Completed: 2021

Certifications

Full Stack Developer Certificate | [View Certificate](#) **LeetCode:** 300+ DSA problems | [View Profile](#)
